Art Unit: 1724

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1:

Group I, claims 1-17 and 23, drawn to a simulated moving bed device; and

Group II, claims 18-22, drawn to a simulated moving bed process.

The special feature linking the two inventions, as evidenced by claims 1 and 18, is a simulated moving bed having a bypass line connecting a "zone" of an adsorbent bed to a remote chamber in the device. Applicant should note that process claim 18 does not require a device with plates having at least one panel comprising a single distribution, mixing and/or extraction chamber; and therefore, this element of apparatus claim 1 is not deemed to form part of the special feature linking the two inventions.

Furthermore, since a simulated moving bed having a bypass line of the type noted above is anticipated by Hotier et al. (col. 4, lines 14-18) or Ferschneider et al. (col. 4, lines 26-30), the special feature linking the two inventions does not provide a contribution over the prior art; and therefore, restriction between the two inventions is deemed to be proper.

Art Unit: 1724

In accordance with 37 CFR 1.499, Applicant is required, in response to this office action, to elect a single invention to which the claims must be restricted.
